

Akinsete, A. A. (1998): Departure process in the inter-changeability of tandem queues with withdrawals. *Zbornik radova*, **20(4)**, 97-103. MR1651901(99i: 60164)

Abstract:

We consider a network of exponential service queues in tandem with arbitrary input. The law of interchangeability in the departure times of all possible orderings is discussed with allowance for customers' withdrawal. We show that the law of interchangeability does not hold in systems with withdrawals unless under symmetric network.
