ОЛОГИИ
ЕРК ТЕОРИИ
БИОГЕНЕЗА
ИЗДАТЕЛЬСТВО „ПУЧИНА“
1924

Marshall Biologist, Professor Victor Fet is the co-editor, with Professor Lynn Margulis, and translator of the historical 1924 book *Symbiogenesis* by Boris Kozo-Polyansky

Kozo-Polyansky (pictured on right) was a brilliant young Russian botanist who synthesized the experimental work of evolutionary biologists across the world to present symbiogenesis as a driving force of evolution.
