

Marshall University's TRIO 2nd Annual STEAM Day!

Students were excited to compete to build the fastest motors at Marshall University's TRIO 2nd Annual STEAM Day, Saturday, November 18, 2023, with help from members of the Society of Physics Students (SPS) Sydney Moore and Jacob Lee and their SPS chapter advisor, Dr. Sean P. McBride of the Mathematics and Physics Department. Approximately 60 students in total rotated through three one-hour workshops each lasting an hour. Students learned how magnetic fields and currents interact to produce magnetic forces on current loops. Students got to take their motors home with them and the winners with the fastest motor received official MU SPS T-shirts. Students, please contact Dr. McBride (mcbrides@marshall.edu) if you have questions about what you did or want to learn more about what a degree in Mathematics or Physics can offer you. Thank you to all the students and teachers for visiting Marshall University! Fun was had by all! All the supplies for the workshop were sponsored by the MU Chapter of the Society of Physics Students through the endowed Society of Physics Students Fund.
